

Review by [Alone Music](#) (May 2011)

Andrea Carri is an 21 years old pianist and composer. He was born in Campegine&nbsp;( Reggio Emilia).

The disk that mainly contains New Age music, describes the journey of life from each of us, you make new experiences and face new adventures, but there are also mischances. In the game of life you are often wondering, exploring the depth of being and at times there appear hidden feelings.

This disk, with 13 tracks, arouses feelings already at the first hearing and underlines the bravery of the young composer.

My warmest congratulations to this young artist, who know very well to communicate with his instrument and who reaches to tell about intense feelings with smoothness and sensitivity and who, above all, knows to transfer these feelings.
